FINNISH EDUCATION DELEGATION

Finnish Education Delegation in New Delhi 17-20 SEPTEMBER 2024

In connection with the DIDAC India event, a delegation of Finnish education experts and education service providers is visiting New Delhi.

Throughout the week, there will be several opportunities to meet with members of the delegation. For those visiting the DIDAC India exhibition, the Education Finland pavilion introduces different elements and represents levels of Finnish education, from early childhood education and care to higher education.

The Finnish experts will be taking part in the workshops held during the event and the audience will have a chance to learn and experience methods utilized in Finnish education.

Workshop 1

Date: Wednesday 18.9

Time: 15:00 – 16:00

Venue: Exhibition Arena

Topic: Excellence quality of Finnish education: what, how and why

Workshop 2

Date: Friday 20.9

Time: 12:30 – 13:30

Venue: Exhibition Arena

Topic: Developing future-ready education today: Adapting Finnish education for India

WHY FINLAND

To succeed in a constantly changing world, you have to change as well. Finland has reinvented itself in just one short century – and we're still at it. Our national character and Northern heritage have boosted us to the top of all kinds of country rankings, especially on education. Certainly, you can benefit from our fresh ideas, extensive knowledge and innovative solutions for education.

World-leading country in education and edtech innovation

The Finnish excellence in education lies in the strong emphasis on lifelong learning. Thus, the aim has been to continuously develop all the levels of education.

Our early childhood and K12 core curricula have been implemented highlighting the importance of individual approach and the 21st century skills. In vocational education and training, the collaboration with companies is stronger than ever before due to the reform launched in the beginning of 2018.

In higher education the vision for 2030 targets to world-class science, R&D and education. Our educational institutes are ready to support the development of e.g. teachers' competencies, curricula, learning environments and digitalization of the schools.

Finland enjoys one of the most advanced and expansive selection of educational technology for all levels of education, ranging from formal to extracurricular learning. Educational technology in Finland is teacher-driven, and there is a good understanding how the technology can complement innovative teaching methods. In combination with the country's strong ICT sector and a booming gaming industry this has helped to create favorable conditions for developing cutting-edge digital learning solutions that make learning fun.

2ND EDUCATION

According to the Legatum Prosperity Index, Finland ranks second out of 167 countries in education. The global index measures access to education, quality of education and human capital.

Source: The Legatum Prosperity Index 2023

3RD RIGHTS OF CHILDREN

Finland ranks third on The KidsRights Index that measures how children's rights are respected worldwide and to what extent countries are committed to improving the rights of children. Finland ranks among the best in category right to education.

WWW.EDUCATIONFINLAND.FI

Education Finland is a governmental cluster programme supporting the best Finnish educational providers in their growth on international markets. The programme is coordinated by the Finnish National Agency for Education and funded by the Ministry of Education and Culture. To become a member, companies must meet strict membership criteria and commit to a code of conduct putting the benefit of the client in the centre. The selected members are given the opportunity to use a label of official membership.

The members represent educational institutes at all levels of education and private companies. Our members' expertise covers educational and learning products – technologies, programs, applications, digital learning suites and software, educational content and materials – to services such as teacher training, pedagogical and vocational programs.

The programme is a hub of Finnish expertise and solutions that can help your organisation and your target groups succeed.
